

STANLEY EKE

2nd Line IT Support Engineer | Regulated & Compliance-Driven Enterprise Environments | Multi-Platform Endpoint, Identity & SaaS Administration

London, UK | +44 (0) 7737 916000 | staanleyeke@gmail.com | [linkedin.com/in/stanley-eke-862892356](https://www.linkedin.com/in/stanley-eke-862892356)

PROFESSIONAL PROFILE

2nd line IT Support Engineer with a track record of resolving escalated tickets, incidents and service requests across Mac, Windows, iOS and Android enterprise environments within regulated, compliance-driven organisations. Currently providing Tier 2 support at GSK London headquarters, resolving 2,000+ tickets, interactions and incidents on ServiceNow while sustaining a 95% SLA adherence rate and a 97% customer satisfaction score, with 100+ five-star reviews earned in under four months. Experienced supporting laptops, desktops, mobile devices and peripherals, including on-site hardware setup, network-related end-user troubleshooting, and printer and networked MFD installation across single and multi-site environments. Strong hands-on knowledge of Microsoft 365 administration including Exchange Online, Teams, Entra ID (Azure AD) and Intune, alongside administration of ServiceNow, Jamf Pro and OneTrust across a range of SaaS platforms, device build, deployment and decommissioning, onsite IT asset management, joiner-mover-leaver account management, and full ticket lifecycle ownership within ITIL-aligned service desk environments. Experienced managing endpoint security, patching and compliance activities, including Zscaler zero-trust connectivity troubleshooting, authoring knowledge articles and Local Working Instructions, and collaborating closely with remote support teams, 3rd line engineers and suppliers to resolve incidents and drive service improvement. CompTIA A+ and Network+ certified, currently pursuing AZ-104 (covering Microsoft Azure administration fundamentals), with a working knowledge of PowerShell and Bash scripting, networking fundamentals, and AV/Microsoft Teams Rooms support. Comfortable prioritising a high volume of concurrent requests across multiple sites in a fast-paced environment, with a methodical, ownership-driven approach and a commitment to service excellence.

CORE COMPETENCIES

Microsoft 365 Administration	Exchange Online, Teams, SharePoint, OneDrive, mailbox management, licensing and provisioning, Power Automate
Identity & Access	Entra ID (Azure AD), Active Directory, Group Policy, SSO/SAML, MFA enforcement, joiner-mover-leaver lifecycle
Endpoint Management	Intune and Autopilot, Jamf Pro, mixed Mac/Windows 11 estate, iOS and Android mobile devices, imaging and decommissioning, MDM policy and compliance
Security & Compliance	Endpoint security, patching and compliance activities, PCI-DSS and ISO 27001 awareness, OneTrust, access control, audit-ready ITAM
ITSM & Service Desk	ServiceNow (100+ five-star reviews), ticket triage and lifecycle ownership, SLA and dashboard reporting, incident and service request management, ITIL-aligned processes
Networking	TCP/IP, DNS, DHCP, LAN/WAN, VPN, Wi-Fi, VLANs, routing, telephony, Zscaler zero-trust network access (ZTNA) troubleshooting, end-user network and hardware setup, printer and networked MFD installation and support
AV & Meeting Rooms	Video conferencing and AV support across 10+ rooms, Microsoft Teams Rooms, Cisco WebEx, executive event support
Scripting & Automation	PowerShell and Bash scripting, runbook authoring, system monitoring
Documentation	Knowledge base articles, SOPs, technical runbooks, Local Working Instructions (LWIs)
IT Asset Management	Onsite asset tracking and CMDB record accuracy, device status management (stock, evaluation, available, disposal) via Intune and Nexthink, IT Asset Management audits, secure hardware disposal
Professional Skills	Customer service excellence, stakeholder communication at all levels, prioritisation in fast-paced environments, compliance-focused mindset

PROFESSIONAL EXPERIENCE

IT Tech Hub Engineer | GSK Headquarters (Contract) Jan 2026 to Present

1st and 2nd line deskside and remote support at GSK London HQ across a mixed Mac and Windows enterprise estate in a regulated, compliance-driven environment.

- Provide 1st and 2nd line IT support for end users across deskside and remote environments, triaging walk-in incidents, service requests and queries in person, by phone and via email; resolved 2,000+ tickets and incidents on ServiceNow while maintaining a 95% SLA adherence rate and a 97% customer satisfaction score, earning 100+ five-star reviews within four months.

- Support and administer Microsoft 365 including Exchange Online, Teams, Entra ID, Intune and licensing, plus mailbox management and provisioning; manage device requests through automated approval workflows across ServiceNow and M365.
- Build, configure, deploy and decommission laptops and end-user devices across a dual-platform estate, managing macOS via Jamf Pro and Windows 11 via Intune and Autopilot, including MFA enforcement and device lifecycle management.
- Manage user accounts and access for starters, movers and leavers end to end, covering laptop builds, IT inductions, IAM compliance, deprovisioning and timely asset retrieval, working closely with People and Workplace stakeholders.
- Troubleshoot hardware, software, Microsoft 365 and connectivity issues across laptops, desktops, mobile devices and peripherals, including Zscaler connectivity faults, escalating policy-related issues to the network security team and using Nexthink diagnostics to identify performance trends.
- Perform routine operational checks and support service desk reporting through active ServiceNow dashboard monitoring, workload prioritisation and SLA reporting, flagging emerging issues and upcoming changes to IT leadership.
- Work closely with 3rd line engineers and suppliers to resolve incidents and support service improvements, conducting root cause analysis and coordinating escalation and technical direction on complex issues.
- Maintain accurate documentation, knowledge articles and Local Working Instructions (LWIs) covering ITSM runbooks and recurring issue resolution, supporting service desk consistency and audit readiness.
- Manage onsite IT assets and maintain CMDB record accuracy, tracking device status on receipt through stock, evaluation, available and disposal stages via Intune and Nexthink, alongside IT Asset Management audits, secure hardware disposal in line with PCI-DSS/ISO 27001, and AV support across 10+ meeting rooms including executive-level events.
- Available to support out-of-hours cover as required alongside core hours, maintaining consistent service continuity for a demanding professional user base.

IT Support Analyst | Teknite Ltd. (MSP) Jun 2025 to Nov 2025

- Managed Microsoft 365 tenants for 300+ users covering provisioning, licensing, Exchange Online, SharePoint and Teams; administered Active Directory and Windows Server environments including DNS, DHCP, file shares and group management.
- Resolved 200+ incidents and managed 500+ tickets in Synchro against SLAs with clear escalation handover notes; led hardware deployment across 400+ PC and laptop builds, 180+ resets and 150+ RAM upgrades, including standalone and networked printer installation and support across client sites.
- Authored 20+ SOPs, knowledge base articles and technical runbooks; coordinated incidents and project tasks via Slack and Jira across multiple client sites.

Freelance IT Support Analyst | Beta-Tech Mar 2025 to May 2025

- Delivered 1st and 2nd line support for 50+ Windows and macOS users via Intune, TeamViewer and AnyDesk; configured networking including switches, WAPs and AD for three client sites.
- Managed 40+ AD account changes, commissioned 30+ new workstations and produced 10+ technical documents and incident reports.

IT Virtual Projects | Home Lab Nov 2023 to Feb 2025

- Built and managed a virtualised Active Directory environment with DNS, DHCP and Group Policy, practising full joiner-mover-leaver account lifecycle management.
- Wrote PowerShell and Bash scripts for provisioning and system automation as part of AZ-104 study, covering Linux VM management and cloud infrastructure fundamentals.

Prison Officer (IT Support Exposure) | UK Government Secure Facility Feb 2024 to Nov 2024

- Supported staff on secure government IT systems, maintaining strict data protection and access control compliance in a high-security, high-pressure environment.

Tech & Systems Oversight (COO) | Zeecrest Vantage Ltd. Jan 2021 to Feb 2024

- Led CRM integration and cloud migration of 200+ client records at Zeecrest Vantage; managed IT onboarding and access provisioning for 30+ staff and coordinated with 10+ vendors to improve process efficiency by 15%.

EDUCATION & CERTIFICATIONS

- MSc Information Security and Digital Forensics, University of East London, commenced 2026
- AZ-104 Azure Administrator, in progress, exam targeted Q3 2026
- CompTIA A+, certified 2025
- CompTIA Network+, certified 2025
- Cyber Security Programme, ITonlinelearning, 2025
- OneTrust Compliance: Tech and Risk Compliance, Privacy Management, Third-Party Risk, 2024
- ITIL Framework awareness: service management principles, continual service improvement and incident management
- BSc (Hons) Psychology, University of Ibadan, 2018

ADDITIONAL INFORMATION

- Comfortable with hybrid working arrangements, including on-site attendance as required for this role.
- Comfortable working autonomously and confidently across all levels of an organisation, from end users through to executive and IT leadership stakeholders.
- Actively developing cloud infrastructure skills through AZ-104 study, information security knowledge through the MSc at UEL, and practical AI tooling skills through ongoing Udemy coursework in AI engineering, agentic systems and AI-assisted coding, applied to personal automation and support-workflow projects.
